GUIDE LITE® Snow Plowable, Raised Pavement Marker

The GUIDE LITE® is a lightweight, snow plowable, raised pavement marker. It is tested to NTPEP. Made of a durable plastic material with abrasion resistant steel rub rails, the GUIDE LITE® weighs substantially less than similarly sized cast iron markers. Installation involves using standard industry reflectors, slot cutting equipment, and adhesive. GUIDE LITE® is designed to allow for snow plows and other road maintenance equipment to glide over the product, without cast iron debris.

Features

- Made of lightweight, yet durable materials.
- Weighs substantially less than similarly sized cast iron markers.
- Uses standard industry reflectors.
- Integrated leveling tabs are designed to help install reflector at proper height above the road surface.
- Installs in asphalt or concrete with standard slot cutting equipment.
- Tested to NTPEP.

Specifications

- Weight: 1.29 lbs.
- Dimensions: L: 9.45 in, W: 5.75 in, H: 1.70 in.
- Reflector height: 0.25 in above road surface.

Typical Installation

1. High-impact, lightweight plastic body
2. Tough, abrasion resistant steel rub rails
3. Integrated leveling tabs
4. Highly-reflective and durable reflector lens
